

Discover how Sealaska Constructors successfully renovated the Cressman Dining Hall at Goodfellow Air Force Base

Problem:

The original quarry tile flooring in the Cressman Dining Hall was no longer suitable for the updated standards of a commercial dining facility.

Solution:

Install an Everlast® Epoxy Floor to meet specifications and requirements set by the USACE, offering a wide variety of selections that the base appreciated.

Results:

The modern, sanitary, and visually appealing flooring has enhanced the dining experience at Goodfellow Air Force Base, while ensuring compliance with USACE requirements.

Cressman Dining Hall: A Modern, Safe, and Hygienic Flooring Solution for Goodfellow Air Force Base

Overcoming budget and time constraints while meeting health and safety standards with Everlast® Epoxy Floor

The Goodfellow Air Force Base in St. Angelo, Texas, has been undergoing extensive renovation and modernization to bring its facilities up to date. Among these projects is the Cressman Dining Hall, built in 1997, which required a full renovation due to substantial water damage and corrosion. A key aspect of this renovation was replacing the original quarry tile flooring with a product that would better meet current health and safety standards for a commercial dining facility. Discover how Everlast Epoxy flooring provided a durable, sanitary, and aesthetically pleasing solution for the Cressman Dining Hall, meeting the stringent specifications required by the United States Army Corps of Engineers (USACE) while overcoming the challenges of limited funding and time.

The renovation project demanded a flooring solution that would meet the health and safety requirements set by the USACE.

The original quarry tile flooring in the Cressman Dining Hall was no longer suitable for the updated standards of a commercial dining facility. Moreover, the project faced funding and time constraints, as well as the need to bring the building up to current code compliance.

The modern, sanitary, and visually appealing flooring has enhanced the dining experience at Goodfellow Air Force Base, while ensuring compliance with USACE requirements.

"The Everlast® Epoxy Floor met our expectations, and the application process resulted in a clean, hygienic surface suitable for a dining facility." - Martin R.

Everlast Epoxy flooring provided a seamless, hygienic surface, ensuring cleanliness and hygiene for the dining facility.

After evaluating several flooring applications, Everlast Epoxy flooring was selected for the Cressman Dining Hall project. It met the specifications and requirements set by the USACE, offering a wide variety of selections that the base appreciated. The base and floor were applied as one unit, creating a durable and easy-to-clean surface. This flooring solution met the expectations of the project superintendent, Martin G. Ramirez, who would recommend Everlast Epoxy to other contractors and architects.

A Clean, Hygienic Surface Suitable For A Dining Facility.

Despite the challenges of limited funding, a tight time frame, and strict health and safety standards, Everlast Epoxy flooring proved to be the ideal solution for the Cressman Dining Hall renovation.

“

The Everlast Epoxy floor met our expectations, and the application process resulted in a clean, hygienic surface suitable for a dining facility. I would recommend Everlast Epoxy to other contractors and architects. - Martin G. Ramirez, Project Superintendent/SSHO for Sealaska Constructors, LLC
